

191 West First South St.  
Cedar City Utah.  
March 12th 1949

Mr Ed.H.Watson,  
State Engineer,  
State Capitol,  
Salt Lake City,Utah.

Dear Sir,

You are advised that the North Field Reservoir & Irrigation Company and the Union Field Irrigation Company of Cedar City, Utah are very much dissatisfied with the division of the ~~###~~ waters of Coal Creek by Cedar City Corporation and the South And West FieldIrrigation Co.

The above mentioned fields wish to protest the method used in dividing the water especially in the summer time when the water is low.They do not have a permanently fixed split but brush and rocks which changes with every summer freshet and is disturbed by young boys using the Irrigation canals for swimming.

The North Field Irrigation Company and the Union Field Irrigation Company requests that the Cedar City Corporation and South & West Field Irrigation Companies be required to install a more permanent and satisfactory system for the division of the waters of Coal Creek.

Very truly yours

*Herbert B. Wright*  
Secretary of North Field  
Reservoir & Irrigation Co.
